Internship

Data Analytics Intern **Feb 2026 - Present**

Infosys Springboard

- Working on "HotelRevAI – AI Driven Revenue Analysis for Hotels", analyzed real-world hotel datasets to evaluate key KPIs such as ADR (Average Daily Rate), RevPAR (Revenue per Available Room), and Occupancy Rate to identify revenue trends and performance patterns.
- Performed ETL and exploratory data analysis (EDA) using Excel and Python to clean, transform, and extract actionable insights for hotel pricing and revenue optimization.
- Developing interactive dashboards in Power BI / Excel and applying AI-based forecasting techniques to visualize hotel performance and generate data-driven business insights.

Projects

InsightyG - Automated Data Analytics System | *Python, NumPy, Pandas, Scikit-learn, Ploty, SciPy* **Mar 2026**

- Built an end-to-end no-code data analytics platform that performs ETL (Extract, Transform, Load) on CSV/Excel data, followed by preprocessing, statistical analysis, and exploratory data analysis (EDA) through interactive dashboards.
- Implemented automated data profiling features including missing value detection, data type identification, summary statistics, and correlation analysis to help users quickly understand dataset structure and quality.
- Designed a user-friendly Streamlit interface with dynamic charts, interactive visualizations, and automated EDA reports, enabling non-technical users to explore datasets and derive insights without coding.

RoadCrashGuard - Accident Analysis & Safety Recommendation System | *Python, Geopy, Folium* **Feb 2026**

- Built a location-based road accident analysis system that fetches user live/nearby location or manually searched locations to analyze accident data and assess road safety.
- Implemented data preprocessing, geospatial analysis, and pattern detection to identify accident trends, high-risk zones, and generate meaningful safety insights.
- Developed an interactive dashboard with charts, maps, and visualizations, providing trend analysis and personalized safety recommendations for better travel decisions.

Certificates

Google Data Analytics **Mar 2026**

Coursera — Certificate Link

Machine Learning with Python **Feb 2026**

freeCodeCamp — Certificate Link

Technical Skills

Languages: C++, Python, Java, JavaScript, SQL

Technologies/Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Scikit-learn, Streamlit, XGBoost, SciPy

Tools & Platforms: Git, GitHub, MySQL, Linux (Ubuntu), Jupyter Notebook, Power BI, Microsoft Excel, Docker

Core Skills: Data Structures & Algorithms, Problem Solving, Data Analysis, Data Visualization, OOP

Achievements

- Solved 300+ Data Structures and Algorithms problems across LeetCode & GeeksforGeeks
- Achieved 5★ ratings in C++, Python, and SQL on HackerRank

Education

Lovely Professional University Punjab **2023 – Present**

Computer Science and Engineering — CGPA: 7.51 *Jalandhar, Punjab*

M.L.S.M College **2021 – 2022**

12th with Science — Percentage: 77.20% *Darbhanga, Bihar*

+2 Jwalamukhi High School **2019 – 2020**

10th with Science — Percentage: 82.80% *Darbhanga, Bihar*
